ПРОЕКТ:

МОДЕЛЬ:

CR5-L

КОЛИЧЕСТВО:

СОГЛАСОВАНИЕ:

ДАТА:

20.09.2026

## CR5-L

Recommended retail price: 239 900 rub

### Technical specifications

|                                                 |                                                       |
|-------------------------------------------------|-------------------------------------------------------|
| Number of levels:                               | 5                                                     |
| GN1/1 or EN 40x60 guide rails:                  | +                                                     |
| Distance between guide rails, mm:               | 68                                                    |
| Environmental conditions (t, °C / humidity, %): | up to +40                                             |
| Dimensions:                                     | 800x800x920                                           |
| Temperature in the room:                        | down to -35°C                                         |
| Case wall thickness, mm:                        | 61                                                    |
| Power supply system, V/Hz:                      | 230 V (240 V)/50                                      |
| Power consumption, W, max.:                     | 800                                                   |
| Refrigerant:                                    | R404/R452                                             |
| Defrost type:                                   | forced, by natural heat inflows when the door is open |
| Thermostat:                                     | Electronic control unit with classic display          |
| Cooling:                                        | +90...+3°C                                            |
| Cooling time:                                   | 90 min.                                               |
| Mass of cooled product, kg:                     | 20                                                    |
| Soft cooling mode:                              | +                                                     |

|                                                |                                 |
|------------------------------------------------|---------------------------------|
| Weight of frozen product, kg:                  | 12                              |
| Freezing time:                                 | 240 minutes.                    |
| Freezing:                                      | +90...- 18°C                    |
| Rapid freezing mode:                           | +                               |
| Thermocouple:                                  | +                               |
| Material of the interior cladding of the body: | stainless steel                 |
| Placement of gastronorm containers/trays:      | On rails for GN1/1 and EN 40x60 |
